

# Sharing Your HealthTrackRx Partnership with Patients

Help your patients understand the benefits of faster, more accurate PCR testing.

## Bringing Advanced Testing to All Patients with HealthTrackRx

We respect your health and your time. That's why our practice partners with HealthTrackRx, a nationwide leader in advanced PCR testing, to identify infections faster and more precisely than traditional lab tests.

With HealthTrackRx, we get next-morning results for common infections. We use advanced testing so we can know exactly what's causing your illness rather than guessing, so you and your family get the right treatment, right away. This helps you get better faster now and protects your health in the future.

## What Is PCR Testing?

PCR (polymerase chain reaction) is a type of molecular testing that detects infections with pinpoint accuracy. It works by identifying the genetic material of bacteria or viruses causing your symptoms.

Unlike traditional cultures that take days to grow in a lab, HealthTrackRx tests provide next-morning results for all common infections. Our tests are designed to catch the viruses or bacteria causing your symptoms, including those that could be resistant to certain antibiotics.

## Why We Chose HealthTrackRx

### Patient benefits:

- **Speed:** You get answers fast — usually by tomorrow morning.
- **Accuracy:** You receive treatment only when needed, avoiding unnecessary antibiotics.
- **Results:** Using the right treatment from the start gets you healthier faster.
- **Protection:** You reduce the chance of resistant infections with effective treatment.

## What This Means For You

When you visit our practice, you can expect:

- Fast, accurate answers when you're sick. For example, if you have strep throat symptoms, we can confirm the diagnosis by the next morning instead of waiting 2–3 days.
- More confidence in your diagnosis and treatment.
- Fewer unnecessary prescriptions.
- Providers focused on getting you the right treatment quickly.

## Ask for HealthTrackRx

If you're being tested for an infection, ask your provider about HealthTrackRx PCR testing. It's one of the best ways we can deliver the right answers—and the right care—so you can get healthier faster.
